

Condor Expands at Vienna Airport: Stationing of one aircraft and new direct flight connection to Frankfurt

The German airline Condor is expanding its flight offering from Vienna Airport within the context of the summer flight schedule. In addition to the popular holiday destinations of Palma de Mallorca, Kos and Rhodes, the airline will also take off and operate a flight heading to Frankfurt once per day for the first time as of the summer of 2025. The fifth largest city in Germany is an important economic centre and the base for Germany's largest airport. With the new flight connection, Condor is strengthening the connection between the airport hubs of Vienna and Frankfurt, creating additional transfer options and destinations for travellers on short and long-haul routes. The base will open in spring 2025.

“Condor takes off from Vienna: The stationing of a Condor aircraft in Vienna and the launch of the daily connection to Frankfurt demonstrate the airline's confidence in Vienna as an attractive starting point for travellers. With this new connection, we are opening up additional short and long-haul travel options via Frankfurt and making Vienna an even more important hub for international flights. We are delighted about the expansion of the range of destinations and the cooperation with Condor”, says Julian Jäger, Joint CEO and COO of Vienna Airport.

“With our new city connections in the Condor summer flight schedule 2025, we are expanding our offering for leisure and business travellers alike. Frankfurt-Vienna is an important component of this: with Vienna, we are connecting a top tourist destination that is also highly attractive for congress and incentive segments. As Austria's largest airport, Vienna is also a valuable partner for developing our tourism offering and, with the stationing of our first aircraft, we will be able to serve summer destinations such as Greece and Majorca directly from Vienna”, states Christian Lesjak, Sales Director at Condor.

Condor in Vienna: First stationed aircraft and daily flights linking Vienna and Frankfurt

In the spring of 2025, Condor will station one aircraft at Vienna Airport for the first time in order to optimally implement its route expansion efforts. It will deploy an Airbus A320-200 in Vienna. In the summer flight schedule for 2025, Condor will operate one flight each day to Frankfurt. The aircraft will leave Frankfurt at 3:05 p.m. and arrive in Vienna at 4:25 p.m. The return flight from Vienna Airport will depart at 7:40 a.m. and arrive in Frankfurt at 9:00 a.m. Frankfurt Airport is a crucial international flight hub enabling global flight connections for both business trips and holiday travellers. The German airline will continue to serve the summer destinations of Palma de Mallorca, Kos and Rhodes from Vienna.

About Condor

Condor has been Germany's leading holiday airline since the year 1956. Each year, it brings more than nine million passengers to about 90 destinations across the globe. The airline operates from Germany's largest airports as well as from Zurich and Basel in Switzerland and from Vienna. Condor operates a fleet of more than 50 aircraft for which maintenance work is carried out at the Frankfurt and Düsseldorf flight hubs in accordance with the highest safety standards. As the very first German airline to operate the modern Airbus A330neo, it launched a fleet modernisation drive at the end of 2022 which will be concluded in 2024. Moreover, Condor will be getting 43 new short-haul and medium-haul aircraft belonging to the A32Xneo family. Further information and booking possibilities are available at www.condor.com.
