The Flughafen Wien Group showed a positive development of passenger traffic in February 2026. Total passenger volume in the entire Group (Vienna Airport, Malta Airport and Kosice Airport) rose 5.8% year-on-year to 2,644,359 travellers. The number of passengers handled by Vienna Airport climbed 1.7% to 1,933,586 in the month of February 2026. The conflict in the Middle East has led to restrictions in air traffic across the region since 28 February 2026 but has not yet had any impact on traffic results in February.

The number of local passengers at Vienna Airport rose slightly by 0.1% compared to February 2025 to 1,568,911 travellers, whereas transfer passenger traffic fell by 0.4% to 324,872. For this reason, the increase in passenger traffic at Vienna Airport is mainly related to refuelling stops on the part of Air India aircraft, in which passengers are not permitted to leave the planes (so-called “transit passengers”).

The number of flight movements in February 2026 declined by 1.9% to 14,694 starts and landings. The seat load factor was up 2.3 percentage points compared to February 2025, reaching 78.1%. Cargo volume totalled 24,705 tonnes, comprising an increase of 6.3% from the prior-year month.
